1. Online Food Delivery Application

Question

A food delivery application allows users to place orders only if the following conditions are satisfied:

1. User must be logged in.
2. Restaurant should be open.
3. Food item should be available.
4. Payment should be successful.

If all conditions are satisfied, the order will be placed successfully.
If any one condition fails, the order should be rejected.

Create a Decision Table for the above scenario.

Requirement Number	1	2	3	4	5
<u>Condition</u>					
User logged in	F	T	T	T	T
Restaurant open	--	F	T	T	T
Food available	-	-	F	T	T
Payment successful	-	-	-	F	T
<u>Action</u>					
Order placed					T
Order rejected	F	F	F	F	

2. Internet Banking Fund Transfer System

Question

A bank allows online money transfer only under these conditions:

1. User account should be active.
2. Correct OTP should be entered.
3. Account balance should be sufficient.
4. Beneficiary account should be registered.

If all conditions are true, money transfer will be successful.

If any condition is false, the transaction will fail.

Prepare a Decision Table for this banking system.

Requirement Number	1	2	3	4	5
<u>Condition</u>					
Account active	F	T	T	T	T
Correct OTP entered	--	F	T	T	T
Sufficient balance	-	-	F	T	T
Beneficiary registered	-	-	-	F	T
<u>Action</u>					
Transfer successful					T
Transfer failed	F	F	F	F	

3. College Examination Hall Ticket Generation

Question

A student can download the hall ticket only if:

1. Student registration is completed.
2. Exam fees are paid.
3. Attendance is above 75%.
4. Student has no pending dues.

If all conditions are satisfied, the hall ticket will be generated.

Otherwise, hall ticket generation should be denied.

Create a Decision Table for the above conditions.

Requirement Number	1	2	3	4	5
<u>Condition</u>					
Registration completed	F	T	T	T	T
Fees paid	--	F	T	T	T
Attendance above 75%	-	-	F	T	T

No pending dues	-	-	-	F	T
<u>Action</u>					
Hall ticket generated					T
Hall ticket denied	F	F	F	F	

4. Flight Ticket Booking System

Question

An airline booking system confirms a ticket only when:

1. User is logged in.
2. Seats are available.
3. Valid ID proof is uploaded.
4. Payment is completed successfully.

If all conditions are satisfied, the ticket is confirmed.

If any condition fails, booking should be cancelled.

Prepare a Decision Table for this system.

Requirement Number	1	2	3	4	5
<u>Condition</u>					
User logged in	F	T	T	T	T
Seats available	--	F	T	T	T
ID proof uploaded	-	-	F	T	T
Payment completed	-	-	-	F	T
<u>Action</u>					
Ticket confirmed					T
Booking cancelled	F	F	F	F	

5. Employee Leave Management System

Question

An employee leave request will be approved only if:

1. Employee has enough leave balance.
2. Manager approval is received.

3. Requested dates do not clash with company holidays.
4. Employee attendance is satisfactory.

If all conditions are true, leave will be approved.
Otherwise, leave request will be rejected.

Create a Decision Table for the above scenario.

Requirement Number	1	2	3	4	5
<u>Condition</u>					
Leave balance available	F	T	T	T	T
Manager approval received	--	F	T	T	T
No holiday clash	-	-	F	T	T
Attendance satisfactory	-	-	-	F	T
<u>Action</u>					
Leave approved					T
Leave rejected	F	F	F	F
